

Does Your Social Media Marketing Make More Money for Your Business?

If not, the #1 reason Social Media isn't working for you is because you don't have a Social Media Strategy to make it work

Most Social Media strategies cost around \$5,000 and that's just too much money for a small business to invest, so the alternative is to use random tactics to get a few Likes and Fans here and there. But you're never going to achieve anything that way!
