

# Membership Database

## Our Solution

BLKMGK ICT's Membership Database provides a complete user friendly solution to membership management. It is designed specifically to assist organisations in their compliance with the Northern Territory Associations Act.

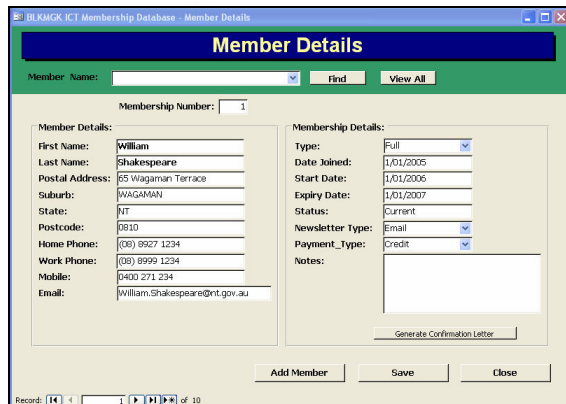

## Management Modules

There are several available management modules that allow you to capture member data as well as other administration information relating to the operation of your organisation. Modules include member details, frequent contacts details as well as equipment inventory.

## Member Details

The Member Details module allows you to capture contact and membership details for each member. The module also has the ability for you to search for a particular member and retrieve their details in order to update them.

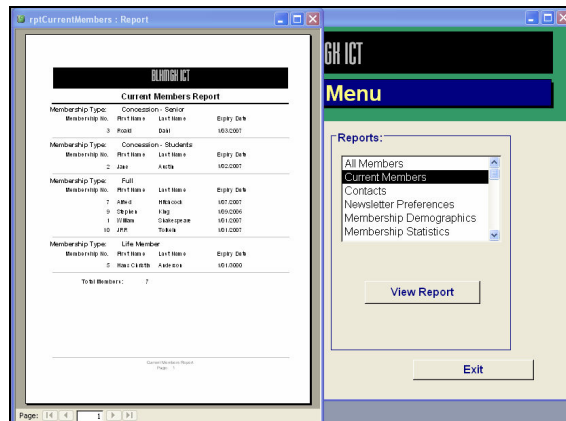

## Reports

The Membership Database has a variety of built in reports to assist Management in the daily tasks of membership administration.

Available reports include:

- A list of All Members (Current and Past)
- A list of Current Members
- Frequently used Contacts
- Membership Demographics and Statistics

Other reports can also be quickly developed and tailored to your organisations requirements ensuring that our Solution meets your exact needs.

## Other Functionality

The database also has extended functionality that includes:

- Generating emails to current members
- Producing member welcome letters
- Generating tax invoice receipts
- Producing mailing labels

## Support and Maintenance

Our Solution has been specifically designed with self maintenance in mind. This means no expensive call out fees for consultants to make minor changes. In addition to this we provide a comprehensive user manual and because we are a local company, on-site technical support is only a phone call away.

In short, our Membership Database Solution takes the hassle out of membership management. Please contact one of our Solutions Analysts to find out how we can assist you in managing your membership today!
